Introduction

The CMN PROFILE ENTERPRISE table contains values that control the behavior of all enterprises in the Argus Insight application.

You can update many of these values by modifying the Profile Switches in the List Maintenance tab on the ADMINISTRATION TOOLS page in Argus Insight.

Other values you can access and update only through direct SQL statements.

In addition to the CMN PROFILE ENTERPRISE table, the CMN PROFILE GLOBAL table contains values that control the behavior of Argus Insight. For more information about the modifying the profile global switches, see the Oracle Argus Insight CMN Profile Global Table Guide.

1.1 Internal Use Rows

During the initial Factory Data load when the database is created, the system creates several Internal Use rows. As the name implies, these rows of values are for Argus Insight internal use only.

Do not modify any values in the internal use rows.

1.2 About the Columns in the CMN PROFILE ENTERPRISE Table

Each profile switch described in this guide includes the following information:

- Section—Lists the name of the section within the CMN_PROFILE_ENTERPRISE table that has the profile switch. The sections are as follows:
 - **SYSTEM**
 - **DATABASE**
 - BOXI (for BusinessObjects XI)
 - COGNOS8
- **Key**—Lists the unique name for the profile switch.
- **Company Defined**—Indicates the method you can use to modify the profile switch:
 - 0 = Indicates you can modify this profile switch only by issuing direct SQL statements. You should modify these profile switches with assistance from Oracle Support.

- 1 = Indicates you can modify this profile switch either by using the options in the List Maintenance tab in the Argus Insight application or by issuing direct SQL statements.
- Name—Lists the name of the profile switch as displayed in the List Maintenance tab in the Argus Insight application.
- **Default Value**—Lists the default value, if defined.
- **Description**—Provides more information about the function of the profile switch.

1.3 Examples of Modifying the CMN PROFILE ENTERPRISE Table

This section provides sample SQL for how to update and insert values in the CMN_PROFILE_ENTERPRISE table in the database.

Note that values, as specified, are case sensitive.

Updating an Existing Value

To update an existing value in the CMN_PROFILE_ENTERPRISE table:

```
UPDATE CMN_PROFILE_ENTERPRISE set value = '10'
WHERE section = 'DATABASE' AND key = 'ABC' AND ENTERPRISE_ID = 2;
commit;
```

Inserting a New Row of Values

To insert a new row of values into the CMN_PROFILE_ENTERPRISE table:

```
INSERT into CMN_PROFILE_ENTERPRISE (section, key, company_defined, name,
value, description, enterprise_id)
values ('DATABASE', 'ABC', '0', 'ABC', '10', 'ABC_DEF_XYZ', 2);
commit;
```

SYSTEM Profile Enterprise Switches

This chapter lists the SYSTEM profile enterprise switches for Argus Insight.

2.1 ACCEPTABLE_ROUTING_JUSTIFICATION_FIELD_ID

Section **SYSTEM**

Key ACCEPTABLE_ROUTING_JUSTIFICATION_FIELD_ID

Company Defined

Name ROUTING JUSTIFICATION ID

Default Value 4050003

Description Specifies the LM_JUSTIFICATIONS.FIELD_ID value. This numeric value is

customer-specific data.

Argus Insight uses this value to retrieve the List Maintenance Values for Acceptable Routing Justification from the LM_JUSTIFICATIONS table.

Argus Insight uses these routing justifications in the Regulatory Submission

and Distribution Compliance Report.

2.2 ACCEPTABLE SUBMISSION JUSTIFICATION FIELD ID

Section **SYSTEM**

ACCEPTABLE_SUBMISSION_JUSTIFICATION_FIELD_ID Key

Company Defined

Name SUBMISSION JUSTIFICATION ID

Default Value 6150002

Description Specifies the LM_JUSTIFICATIONS.FIELD_ID value. This numeric value is

customer-specific data.

Argus Insight uses this value to retrieve the List Maintenance Values for Acceptable Submission Justification from the LM_JUSTIFICATIONS table.

Argus Insight uses these submission justifications in the Regulatory

Submission and Distribution Compliance Report.

2.3 ARGUS_MART_DB_NAME

Section **SYSTEM**

Key ARGUS_MART_DB_NAME

Company Defined 1

Name ARGUS MART DB NAME

Default Value

Description Specifies the database instance name for the Argus Mart data mart. This

information will be used to connect Argus Insight application with Argus

Mart database.

2.4 ARGUS_MART_USER_NAME

Section **SYSTEM**

Key ARGUS_MART_USER_NAME

Company Defined 1

Name ARGUS MART USER NAME

Default Value
